

Power controllers | THYRITOP 300

PRODUCT ADVANTAGES

- Resistive and inductive loads
- Use from 24 VAC to 600 VAC and from 16 A to 1,500 A
- Built-in ultra-fast fuse
- Built-in human-machine interface
- Power connection via top or bottom
- Digital communication via bus module

NEW

► Description

The **THYRITOP 300** models represent the latest generation of power controllers for all types of resistive or inductive loads.

► Operation

The **THYRITOP 300** can operate in four modes:

- On-off (SWITCH),
- Syncopated wave train (TAKT),
- Fast syncopated wave train (QTM),
- Phase-angle variation (VAR).

These modes can be configured via the graphical interface or via software.

This ensures that **users can adapt to all types of power control**, such as resistors with a significant hot/cold coefficient, silicon carbide, molybdenum, tantalum, tungsten, transformer primaries, etc.

► Power circuit

Circuit	Single-phase or three-phase with 2 or 3-phase cut-off
Rated current	16 A to 1,500 A
Rated voltage	230 V, 400 V, 500 V, 600 V
Network frequency	47 to 63 Hz
Operating voltage	From 24 VAC up to the rated voltage +10 %

► Control circuit

Analogue	2 configurable analogue inputs: • 0/4...20 mA ($R_i = 250 \Omega$) • 0...5 V ($R_i = 44 k\Omega$) • 0...10 V ($R_i = 88 k\Omega$)
Potentiometric	5 k Ω to 10 k Ω
Digital	Via bus module
Other	Logic input for start-up authorization

► General specifications

Control	<ul style="list-style-type: none"> • U and U^2 to $\pm 1.5 \%$ • I and I^2 to $\pm 1.5 \%$ • P to $\pm 3 \%$ • No control
Supervision	<ul style="list-style-type: none"> • Internal faults • Partial load fault • Under or overvoltage • Under or overcurrent • Excessive temperature • Fuse blown, etc.

Alarm	1 x relay (250 V / 4 A), configurable
Fault indication	Display on graphical interface + error message
Recording	Up to 64 time/date-stamped events (real-time clock)
Retransmission	3 x configurable analogue outputs (0...10 V or 0/4...20 mA)
Auxiliary inputs / outputs	3 configurable logic inputs/outputs
Auxiliary power supply	110/230 VAC (85-265 VAC) <ul style="list-style-type: none"> • Internal transformers • Possibility of wiring external transformers
Configuration	Via the graphical interface or the THYRITOP-Tool 300 software
USB interface	For PC connection (THYRITOP-Tool 300) and back-up/loading of parameters on USB stick
Ethernet interface	For PC connection (Thyritop-Tool 300), built-in Web server for viewing the values in real time
Insulation	As per EN 50178
Protection	IP 20
Installation conditions	Vertical mounting and power connection at top or bottom
Climatic conditions	<ul style="list-style-type: none"> • Rated current from -10 °C to +40 °C • Reduced current up to +55 °C (-2 % of current per additional °C)
Compliance	CE + UL
